

Dual Enrollment Online Course Offerings and Descriptions 2024-2025

Course Code	Course Title	Credit Hours	Term Offered	Course Description
ART 106	Introduction to Graphic Design	3	Fall	Students learn and apply fundamentals of various software applications (such as Illustrator and Photoshop), web design, image editing, drawing and graphic animation.
ART 111	Art Appreciation	3	Fall and Spring	An introduction to the wide range of styles, materials, and techniques in art with desired focus on appreciation. The course will investigate the flow of art and cultural ideas throughout western civilization.
BIO 120	Human Biology	3	Fall	This course will examine the normal processes and interactions that occur within human biology beginning with a basic understanding of life and the scientific method and progress to chemical, cellular, and tissue levels before moving to organ systems and a larger view of how humans fit into the world ecologically. The study will consider the relationship between form and function as well as homeostasis.
BIO 220	Medical Terminology	3	Spring	An introduction to the medical terminology through the study of root words, prefixes, and suffixes commonly used in medical fields. The course will emphasize etymology, definitions, pronunciations, and correct utilization of medical terms, which enable the student to develop a vocabulary essential to the understanding of and communication with the various health areas in which allied health professionals will serve.
BUS 251	Principles of Macroeconomics	3	Fall	An introduction to macroeconomics with emphasis on applying basic macroeconomic models to recent economic events. Special consideration is given to the determinants of unemployment, inflation, and economic growth.
COM 100	Understanding Human Communications	3	Spring	A survey of the discipline of communication and its many-faceted fields. The course will examine the origins and history as well as core concepts, theories and practices at work in both mediated and non-mediated human communicative behaviors.
ENG 101	Composition I	3	Fall	This course involves the reading of essays from disciplines across the curriculum and emphasizes the writing process. Students write papers in various rhetorical modes. A documented paper is required
ENG 102	Composition II	3	Spring	Continuation of ENG 101 and an introduction to writing about literature: fiction, drama, and poetry. Research techniques are introduced, and the completion of a research paper is one of the requirements of the course.
HLT 161	Environmental and Public Health	3	Spring	A study of health problems of community living with emphasis on environmental concerns, prevention and control of communicable disease, available health services, consumer health concerns, aging, and dying.

HLT 263	Nutrition	3	Fall and Spring	This course examines basic nutritional principles and the effects on the human body. Emphasis is on diets, analysis of diets, and practical application for physical fitness, health, and altered states of health throughout the life-cycle
HLT 264	Safety and First Aid	3	Fall and Spring	Emphasis is on first-aid methods, techniques, and skills needed for emergency management and home and environmental safety. Certification in American Red Cross and Responding to Emergencies (including adult CPR).
HIS 152	History of the United States II (since 1877)	3	Spring	A broad survey of the United States from the Gilded Age to the present, including aspects of American political, economic, social, and cultural development. Familiarity with and understanding of the major and conflicting interpretations of American history is also expected.
MAT 131	College Algebra	3	Fall	This course focuses on functions. Problem solving is emphasized. Mathematical modeling through the solution of word problems is also introduced.
MAT 132	Essentials of Statistics	3	Spring	This course provides an introduction to elementary probability theory, descriptive statistics and inferential statistics. Discrete and continuous distributions, including the binomial and normal distributions, are treated, as are the topics of linear regression, hypothesis testing, confidence intervals.
MUS 207	Music Appreciation	3	Fall Spring	For the student interested in developing an appreciation of music from the structural and historical points of view. The course includes an examination of the elements of music, repetition, form, mediums, and style characteristics from 1450 to the present. Credit may not be used toward a major in music.
POL 101	Introduction to Political Science	3	Fall	The purpose of this course is to provide students with an introduction to political science as an academic discipline. It will primarily be taught from a comparative perspective. Topics of discussion will include modern ideologies and political philosophy, the development of the modern state, public policy, political economy, political institutions, constitutional design, and international relations. After successful completion of this course, you should achieve a basic understanding of political science as a discipline and gain a larger perspective on what politics is and how it is practiced throughout the world.
POL 102	American Government and Politics	3	Spring	A broad survey of the national, state, and local government of the United States and the role of American foreign policy, the development and interpretation of the constitution, the functions and operation of the organs of government, and party organization and politics
PSY 101	Introduction to Psychology	3	Spring	A comprehensive survey of the field of psychology, defined as the scientific study of behavior; topics include development, personality, social interaction, abnormal behavior, learning, and motivation. PSY 101 is a prerequisite for many PSY courses numbered 200 or higher.
SPE 101	Introduction to Speech	3	Spring 2024	This course is for the undergraduate student who seeks to develop and improve his/ her public communications skills. In order to achieve this goal, lectures will enhance the student's understanding of the human communication process; the student will present four or more speeches to demonstrate the level of skill mastery he/she has achieved; and exams will assess the knowledge of communication that the student has acquired.
SWK 231	Introduction to Social Work	3	Fall	A survey of the philosophy, history, and practice of social work profession in our society; an overview of the development, training, and ethics of social work professionals; develops a point of view (theory and practice) of social work related to the structure of our society and the worth of the individual. Includes a strong "growth in self-awareness" component which is crucial in the social work field.
